**DETAILED ACTION**

***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The instantly claimed catalyst and processes for its production and use are neither disclosed nor fairly suggested by the closest prior art: Heidemann et al (US 6,849,574 02-2005). Heidemann teaches (Column 18, lines 47-67) a process for the synthesis of phthalic anhydride from o-xylene by sequential passage through distinct supported beds of silver-vanadium pentoxide bronze and  $TiO_2-V_2O_5$  catalyst. Heidemann, however, neither discloses nor fairly suggests the incorporation of the two distinct catalysts as phases in a single catalytic composition. Heidemann, in fact, can be seen to teach away from such a modification in his discussion (Column 15, lines 18-61) of the advantages of distinct sequential catalyst beds. One of ordinary skill in the art would therefore not have been motivated to make the instantly claimed modification of Heidemann and would not have had a reasonable expectation for success in such modification. The instantly claimed catalyst and processes for its production and use are therefore patentable over the teachings of Heidemann, the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
